

The Climb is Worth It. Here's Why.

The Emerging Leader Accelerator was designed for current and emerging leaders who feel under-prepared for leadership and are willing to grow into their potential as leaders, with skill and stamina for the climb.

THE EMERGING LEADER ACCELERATOR

Are you a manager or executive who wants to be more effective as a leader? Did you promote a founding member of your team, only to find that they are struggling? Do you have a direct report you don't want to lose who has potential to be a leader? Are you a start-up CEO of who wants to grow as a leader? These are commonalities of prior participants.

Guarantee: Fully engaged participants become conscious and aware. Their development leads them to being effective as a leader. They embrace their unique challenges identified in pre-testing, and post-test to quantify specific leadership mastery gains.

Importantly, participants in this program put a **Stake in the Ground** to cause one specific improvement in their organization that is attributable to their improved leadership. This area of impact is pre-tested and post-tested in addition to the individual's leadership mastery. Accelerator Graduates have prepared to lead the climb.

An Accelerator Graduate is Someone Others will Follow

6 Months of Leadership Development: The Emerging Leader Accelerator focuses on BEING a leader, not on skills, such as financial analysis, which can be acquired through classes or on the job training. The Accelerator creates access to the more powerful and more subtle human dimensions of leadership, such as holding people accountable while not making them wrong and simultaneously creating the desire in them for excellence as team members and fellow contributors to their enterprise' success.

Pre-Test: Enrollment into the Emerging Leader Accelerator begins with a pre-test including overall Leadership Paradox Mastery plus Emerging Leader Behavioral Competency, each comprised of individual traits. Of those traits, participants select three with Pamela's support that, when improved, will most increase their leadership effectiveness.

Post-Test: includes a review and analysis of the participant's results.

Tangible Take-Aways include a **Certificate of Achievement** suitable for framing.

Pamela Stambaugh is uniquely qualified to provide the Emerging Leadership Accelerator. Learn why, and also learn more about the Emerging Leader Accelerator [here](#).

Tangible Proof of Reaching your Goal

Actual before and after results from an Emerging Leader Accelerator Graduate. These dramatic gains are available to participants who pull the course to themselves and integrate the coaching in practice.
